FINANCIAL AND COMMERCIAL.

The sudden advance in gold late yesterday afternoon was not sustained at the opening this morning, owing to the reports from Washington which caused the rise having proved telse. The earliest transactions were at 120%, following which the price gradually rose to 140%, after which it reacted to 130%, and the closing the price of the board was quotation prior to the adjournment of the board was 139% a 139%. Subsequently there was more disposition shown to sell than to buy and the latest quotation was 139% a 139%. The "abort" interest having been greatly reduced, the borrowing demand has correspondingly diminished, and loans were made at rates rafying from four to nine per cent for carrying and without interest. The volume of business was large, and there vas considerable excitement at intervals in the dealings. The clearings yesterday at the Gold Exchange Bank

The clearings yesterday at the Gold Exchange Bank amounted to the heavy sum of \$151,271,000.

Contrary to the general expectation, the passage of the anti-contraction bit in the Senate by the almost thanimous vote of thrity-three against four was withcut effect upon the Stock Exchange, and railway and other speculative shares were drooping until near the close of the day, when the market began to react. The ultimate result of this important measure must not, however, be measured by this, for it is impossible that it can fail in working a bowerful change for the better in both financial and dommercial affairs all Ever the country. In Wall street the effect was less than it would otherwise have been in consequence of the bill having been passed at a known then the leading bull operators were endeaverning to depress the stock market, in order that they high the enabled to buy back the securities they sold at the end of last week, in which sindayor they have been assisted largely by the bears lookay, the consequence of which was that the bull chiques began to buy heavily and they will turn the short' interest to produble account in the next up-ward movement, when is now imminent. The vote of twenty-three to fifteen in the Senate against Mr. Conkaing's amonatement to the bull in account in the next up-ward movement, when is now imminent. The vote of twenty-three to fifteen in the Senate against Mr. Conkaing's amonatement to the bull in guestion, providing that it really favors inflation. The bill passed the Senate in gubstantially the same form as it came from the House; but the wording was changed and it has, therefore, been sent back to it for concurrence, where it will be reported to-unorrow. Its influence in restoring confidence can hardly be overrated, and under it values will appreciate. On the Stock Exchange in twenty will appreciate. On the Stock Exchange in the stock will appreciate. On the Stock Exchange in the stock of the stock restoring confidence can hardly be overrated, and under It values will appreciate. On the Stock Exchange it ill probably soon make itself felt in a mero active speculation for a rise than we have witnessed since the fall of 1888. All the conditions affecting the market are favorable to this, money being abundant and the earnings of the railways large, the car-rying trade being about the only one that has not shared in the depression which has marked business in general during the past year. As an instance in point we may quote the Eric Railway, whose earnings in December last were \$1,041,646, against \$1,041,115 in the corresponding month in 1866, the increase being \$531.000. Moreover, economy appears to be the order of the day in rallway management, nd the Eric, the New York Central and the Pennsylania Central companies have just agreed upon rates of id largely to their aggregate earnings. The free pass system is to be abolished on those lines, and baggage in excess of a hundred pounds for each passenis to be charged for as first class freight. The estern exchanges are still largely in favor of this ontre, and the supply of loanable funds is steadily inreasing. Loans are made freely by the banks at six per cent, and in not a few instances large amounts are placed at five, while first class commercial paper is

alable at 7 a 7 1/4 per cent on the street.

Government securities were in good investment deand at the counters of the leading dealers, and prices were 14 a 14 per cent higher than yesterday, partly in sympathy with the advance in gold; but with the deline in the latter in the afternoon five-twenties yielded fraction. The market closed firm, however, at the ubjoined quotations:—Registers 1, 1881, 109% a 109%; oupon, 1881, 100% a 109%; 5-20's, registered, 1882, 106 a 108%; 5-20's, coupon, 1882, 109% a 109%; 5-20's, 10., 1864, 107% a 107%; 5-20's, do., 1865, 108% a 108%; do., 1865, January and July, 105% a 105%; do., 1867, 105% a 105%; 10 40°s, registered, 102% a 102%; do., boupon, 102% a 102%; June 7.30°s, 105% a 105%; July 7.30°s, 105% a 105%; May compounds, 1865, 117% a 117%; August do., 116% a 116%; September do., 116%
